

ENTERPRISE DATA GOVERNANCE FRAMEWORK DESIGN & IMPLEMENTATION FOR E-COMMERCE PLATFORM TRANSFORMATION

DATA GOVERNANCE POLICY

1. POLICY OVERVIEW

1.1. Purpose

This policy establishes the framework to ensure that all enterprise data is:

- Accurate, consistent, and reliable
- Secure and protected
- Compliant with applicable regulations
- Properly governed across its lifecycle

1.2. Scope

This policy applies to:

- All business units (Marketing, Operations, Finance, Supply Chain)
- All data domains:
 - Customer Data
 - Product Data
 - Order & Transaction Data
 - Vendor/Supplier Data
- All systems:
 - Web & Mobile Platform
 - Data Warehouse / Data Lake
 - BI & Analytics tools

1.3. Objectives

- Establish clear data ownership and accountability
- Improve data quality and trust
- Enable regulatory compliance
- Support data-driven decision-making

2. DATA GOVERNANCE PRINCIPLES

1. Data is an enterprise asset
2. Ownership and accountability are mandatory
3. Data quality is proactively managed
4. Security and privacy are enforced by design
5. Data must be fit-for-purpose
6. Governance is embedded across lifecycle

3. ROLES & RESPONSIBILITIES (RACI-ALIGNED)

3.1. Data Owner

- Accountable for data quality, usage, and compliance
- Approves access and data definitions

3.2. Data Steward

- Maintains data definitions and metadata
- Monitors data quality issues

3.3. Data Custodian (IT)

- Manages storage, processing, and security controls

3.4. Data Governance Council

- Approves policies and standards
- Resolves cross-domain issues

RACI Overview

Activity	Owner	Steward	Custodian	Governance Council
Data Definition	A	R	C	I
Data Quality Monitoring	A	R	C	I
Access Control	A	C	R	I
Policy Approval	R	C	I	A
Metadata Management	A	R	C	I
Issue Resolution	A	R	C	I

(R = Responsible, A = Accountable, C = Consulted, I = Informed)

4. DATA CLASSIFICATION POLICY

4.1. Classification Levels

Level	Description	Example
Public	Non-sensitive data	Product catalog
Internal	Internal use only	Sales reports
Confidential	Sensitive business data	Pricing strategy, margin data
Restricted (PII / highly sensitive)	Personal data and highly sensitive regulated data	Customer personal data (Customer name, email, phone, address, identifiers)

4.2. Handling Rules

Level	Encryption	Access	Masking
Public	Not required	Open	No
Internal	Optional	Role-based	No
Confidential	Required	Restricted	Partial
Restricted	Mandatory	Strict RBAC	Full masking

5. DATA QUALITY POLICY

5.1. Data Quality Dimensions

- Accuracy
- Completeness
- Consistency
- Timeliness
- Uniqueness

5.2. Data Quality Rules (Example)

Domain	Rule	Threshold
Customer	No duplicate email	100% unique
Product	Price must not be null	100% completeness
Transaction	Valid payment status	99% accuracy

5.3. Monitoring

- Automated data quality checks
- Data Quality Scorecard
- Issue tracking & remediation workflow

6. DATA ACCESS & SECURITY POLICY

6.1. Access Control

- Role-Based Access Control (RBAC) mandatory
- ABAC may be implemented for high-volume or context-sensitive access scenarios (e.g., geography, business unit, sensitivity labels)
- Least privilege principle enforced

6.2. Authentication & Authorization

- Multi-factor authentication for sensitive systems
- Periodic access review (quarterly)

6.3. Data Protection

- Encryption:
 - At rest
 - In transit
- Data masking for PII

7. DATA LIFECYCLE MANAGEMENT

7.1. Lifecycle Stages

- Creation
- Storage
- Usage
- Archival
- Deletion

7.2. Retention Policy (Example)

Data Type	Retention
Transaction Data	5 years
Customer Data	Active + 2 years
Logs	1 year

Note: Retention periods shown are illustrative defaults and must be confirmed with Legal/Compliance based on applicable tax, accounting, payment, and data-protection requirements.

7.3. Deletion

- Secure deletion required
- Must comply with regulatory requirements

8. METADATA & DATA CATALOG POLICY

8.1. Requirements

- All critical data must be registered in data catalog
- Business glossary must be maintained

8.2. Metadata Coverage

- Data definitions
- Data owner & steward
- Lineage
- Data classification

9. DATA LINEAGE & TRACEABILITY

- End-to-end lineage must be documented
 - Target: 100% of Tier-1 / critical datasets have documented end-to-end lineage within the data catalog.
- Impact analysis required before changes
- Mandatory for critical datasets

10. MASTER DATA MANAGEMENT (MDM)

Scope

- Customer
- Product
- Vendor

Rules

- Single source of truth
- Golden record management
- Deduplication processes

11. DATA ISSUE MANAGEMENT

11.1. Issue Classification

- Critical (business impact)
- High
- Medium
- Low

SLA Table (Example):

Severity	Initial Response	Target Resolution
Critical	< 4 jam	< 24 jam
High	< 1 hari kerja	< 5 hari kerja
Medium	< 2 hari kerja	< 10 hari kerja
Low	< 5 hari kerja	< 30 hari kerja

11.2. Workflow

1. Issue detected
2. Logged in tracking system
3. Assigned to Data Steward
4. Root cause analysis
5. Resolution & validation

11.3. Data Security & Privacy Incident Management

1. Detect and classify incident
2. Containment and access revocation where necessary
3. Notify Security, Privacy Officer, Legal, and Governance Lead
4. For regulated personal-data incidents, follow applicable notification obligations
5. Post-incident RCA and corrective actions

12. COMPLIANCE & REGULATORY

Applicable regulations:

- Personal Data Protection
This policy aligns with applicable data protection and electronic-system regulations, including Indonesia's Personal Data Protection Law (UU No. 27/2022) and relevant implementing regulations. GDPR principles may be adopted as a reference framework where appropriate.
- Financial transaction compliance

12.1. Audit

- Regular internal audit
- External audit readiness

12.2. Non-Compliance

- Escalation to Governance Council
- Corrective action required

12.3. Exception Management & Policy Waiver

- Requests for temporary policy exceptions must be documented, approved by the Data Owner and Information Security, reviewed by the Governance Council for high-risk cases, and include expiration date, compensating controls, and remediation plan.

13. GOVERNANCE KPIs

- Data Quality Score (>95%)
- % Data with assigned owner (100%)
- Data incident reduction
- SLA for issue resolution

14. ENFORCEMENT

- Mandatory compliance for all employees
- Violations subject to disciplinary action

15. REVIEW & MAINTENANCE

- Policy reviewed annually
- Updated based on regulatory changes
